WELCOME TO ICCU 2026

Dear Colleagues & Guests,

ICCU 2026

It is our pleasure to extend you our very warm welcome on behalf of the Iranian Society of Atherosclerosis. We are grateful that you have accepted our invitation to attend the "26th International Congress on Cardiovascular Updates" in Tehran.

Year after year, this congress offers us the opportunity to renew contacts and hold discussions with delegates from all over the world on the pertinent issues of healthcare.

The speeches and events outlined in the congress agenda are arranged to cover a wide range of core topics in the fields of cardiovascular diseases.

We wish all our guests, whether from Iran or visiting from abroad, a productive and successful congress.

We also wish you a pleasant stay in Tehran. We thank all our sponsors, whose support made this significant gathering possible.

As we stand here surrounded by colleagues, humbled by what we've accomplished, yet inspired by hopes and dreams, hopes and dreams we wish to turn into reality. We hope to be able to offer better patient care and make advancements in the field.

Together we can draw strength from our bonds and learn from one another to expand our horizons.

We look forward to welcoming you in the 26th International Congress on Cardiovascular Updates (ICCU 2026).

Sincerely,

Massoud Ghasemi, MD.
President of Congress

Masoud Eslami, MD.
Scientific Secretary of Congress

Massoud Ghasemi MD

President of Congress

This year's Congress represents an effort toward the reengineering of the diagnostic-to-treatment pathway. The central framework of the scientific programs of the 26th International Congress on Cardiovascular Updates has been developed with the participation of distinguished professors from specialized and subspecialized cardiovascular fields, including interventional cardiology, electrophysiology, echocardiography, endovascular and peripheral interventions, heart failure, internal medicine, and related disciplines. It is built upon interactive and challenging specialized panels and focused symposiums, with the aim of replacing one-way transmission of knowledge with an environment of "critical discussion and analysis."

We believe that knowledge reaches its true fulfillment when it leads to equitable and sustainable access for all people to “high-quality healthcare services.” Therefore, the 26th Congress, with a special focus on empowering specialists throughout the country, considers its mission to be the direct transfer of knowledge from the heart of this major event to all regions of the nation, including the most remote border areas, ensuring that no heart anywhere in this land ceases to beat due to geographical distance or the turbulence of the times.

We are aware that the heartbeat of our profession today is accompanied not only by scientific concerns, but also by accumulated fatigue and the complex pressures of life that have cast their shadows over our professional and social dimensions. Therefore, this year, under the motto “Let us move toward the future with our hearts,” we have sought to unite knowledge with humanity, so that on the path of prevention and treatment, we may serve as a source of hope and support for patients and take a firm step toward the advancement of cardiovascular science and the improvement of public health.

Special Thanks

from the Scientific Committee
